FREESIA "TECOLOTE" HYBRIDS

The most striking characteristics of this New Strain are the IMMENSE size of the Flowers, and the Un-usual Strength and Vigor of the Plants. Wide open Flowers of Great Substance, individual blooms measuring more than two and one-half inches in diameter are not uncommon. Delightfully fragrant.

The Stiff Heavy Stems average from twenty-four to thirty inches in length with many side branches, a great advantage to retail growers who can use the individual flowers as required.

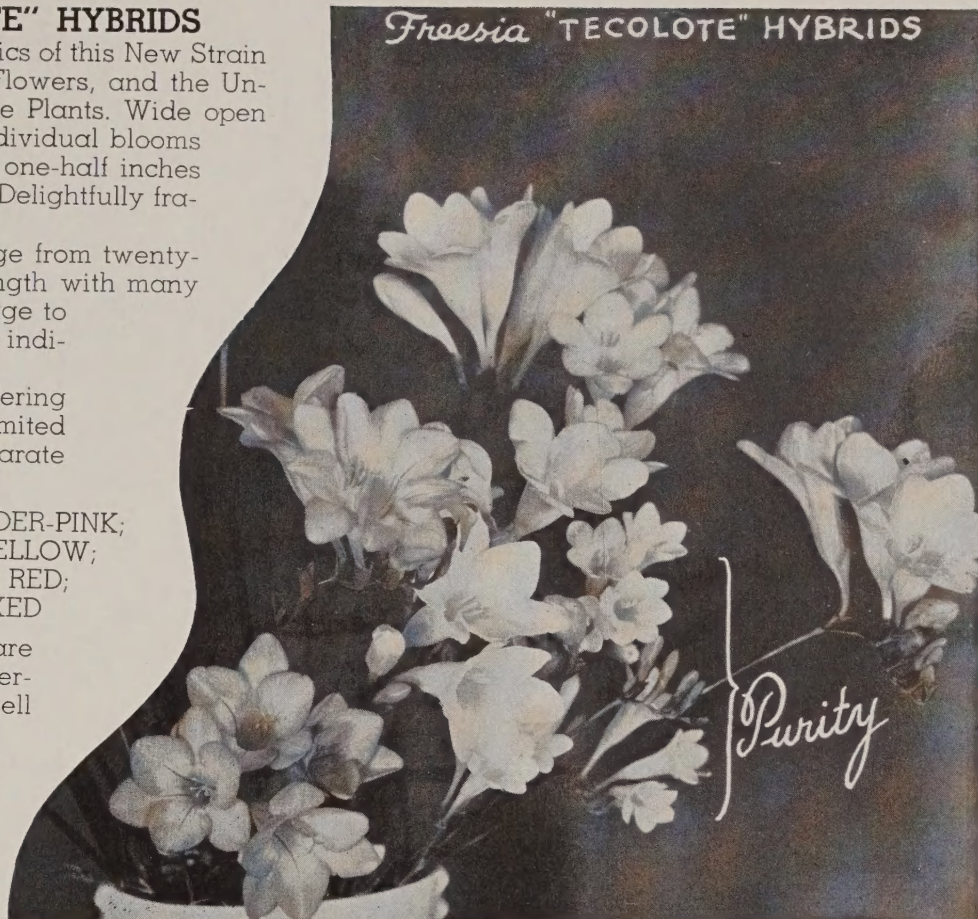

This present season we are offering Freesia "Tecolote" Hybrids in limited quantities of the following separate colors.

SOLID PURE WHITE; LAVENDER-PINK;
BLUE; PINK; LIGHT YELLOW;
LAVENDER-BLUE; BRIGHT RED;
